

Wireless Addressable Fire Alarm System

NFire is the revolutionary wireless addressable fire alarm system, designed and manufactured in India by Nivid Electronics India and marketed by Atigo Electronics India which are part of the UK based Nivid group. Growing at a fast pace, Atigo is one of the leading electronic security and safety solutions provider in India. Manufactured with the highest quality European standards our NFire range is one of the most advanced Fire Detection Systems on the market. The company was established under MOU signed with the Government of Gujarat during Vibrant Gujarat summit. Our mission is to develop systems that provide safety against fire hazards and are specially designed for the Indian environment.

Designed, Developed and Manufactured in India for the Indian Market, NFire is India's 1st wireless addressable fire alarm system. It conforms to US-NFPA-10th Edition Specifications and is certified with CE, ROHS and ISO 9001-2005. NFire is a state-of-the-art product that adheres to International standards ensuring highest safety for its users.

NFire also offers a unique 24x7 Live emergency monitoring service. Notifications are sent via live call and SMS by a team of highly trained monitoring officers.

A Professionally run industry leader, we assure that all products and technologies provided are industry best with top notch quality which exceed our customers' expectations at all times. Backed by energetic and diversified engineering teams the company has heavily invested into the area of technology research, IOT, Embedded, real time systems development and manufacturing.

More Profits, More Opportunities

We are proud to have one of the largest partner networks in the country. Our partners are the lifeline of our business and help us to reach every corner of India with a local presence. Over the years we have been able to partner with various type of partners however, for us each and every partner is equally important and has contributed towards our growth.

We believe that growing together is always the way forward and hence we have been fortunate to have such a strong and loyal partner base which has only grown stronger over the years.

High Range Solutions for Large Corporations

NFire Alarm Monitoring Server is smart server solution perfectly suited for large NFire alarm solutions. NFire AMS is a complete turnkey solution consisting of both hardware and software. AMS Makes sure that the Right People are notified, at the Right Time.

The server is capable of simultaneously monitoring events from large number of NFire alarm panels and devices in real time. Multiple safety officers on separate workstations can login to the Alarm monitoring server (AMS) and collaboratively manage real-time alarms coming from all various NFire alarm panels and devices.

The NFire Alarm Monitoring Server Key Features

| Fire and Smoke Detector

| Fire and Smoke Detector with Response Indicator

| Carbon Monoxide Detector

| Gas Detector

| Temperature Sensor

| Wireless Supervisory Monitoring Device (WSMD)

| Manual Call Point

| Signal Repeater

| NAC Signal Repeater

| Outdoor Siren

| Strobe

| Wireless Equipment Trigger Device
